Professional Summary

Results-driven Software Engineer with 5+ years of experience building scalable, cloud-native applications using AWS and modern JavaScript frameworks. Skilled in serverless architecture, infrastructure as code, and CI/CD automation, with a strong focus on performance, reliability, and cost optimization. Proven track record of reducing deployment times, improving system efficiency, and delivering high-impact solutions in distributed environments.

Core Skills

Programming Languages: JavaScript, TypeScript, Python

Cloud Platforms: Amazon Web Services (AWS)

Infrastructure as Code: AWS CDK, CloudFormation, Serverless Framework, Terraform

AWS Serverless: Appsync, Lambda, S3, Cognito, DynamoDB, API Gateway, SNS, SQS, EventBridge, Amazon Bedrock

AWS Services: IAM, AWS Organization, EC2, EFS, EBS, ELB, VPC, RDS, ECS, EKS, CloudWatch, Secrets Manager, SSM Parameter Store

Container & Orchestration: Docker, Kubernetes

CI/CD: GitHub Actions, Jenkins, AWS CodeDeploy, AWS Codepipeline, ArgoCD

Work Experience

Full Stack Engineer

Cooliodev – California, US | May 2023 - December 2025

- Led client requirement gathering and technical consultations, improving client satisfaction scores by **80%**
- Designed and provisioned AWS Infrastructure using AWS CDK Typescript, reducing deployment times from **3 hours** to **10 minutes**
- Automated build and deployment processes with GitHub Actions CI/CD pipeline across 3 environments, eliminating **85%** of manual work
- Implemented idempotency in AWS Lambda Webhook processing, ensuring exactly once processing and data consistency
- Utilised AWS AppSync Lambda batch resolvers to eliminate the GraphQL N+1 problem, significantly reducing downstream DynamoDB calls

Software Engineer

OCloudSolutions – Lahore, Pakistan | January 2020 - March 2023

- Developed a React-based serverless application with AWS Amplify, delivering the MVP on time while **reducing operational and development costs**.
- Implemented real-time updates using MongoDB streams and PusherJS, significantly enhancing user engagement and responsiveness.
- Led a team of 2 developers, assigning tasks and onboarding them to an existing project.
- Optimised React code with code-splitting and lazy loading, reducing load time by **30%** and improving user retention

Education:

BS in Information Technology – Lahore, Pakistan | 2020
