Profile

Full-stack Software Engineer with 3+ years of experience developing scalable web applications. Skilled in JavaScript, React, Next.js, and Node.js. Proven track record of helping clients go to market faster by utilizing serverless architecture.

Skills

- **Programming Languages:** JavaScript, TypeScript, Python
- **Frontend:** HTML5, CSS3, React, TailwindCSS, ShadcnUI
- **Backend:** Nodejs, NestJs, ExpressJs,
- **Databases:** MongoDB, PostgreSQL
- **Serverless:** Appsync, Lambda, S3, Cognito, DynamoDB, API Gateway, Amazon Bedrock
- **Infrastructure as Code:** AWS CDK, CloudFormation, Serverless Framework

Professional Experience

WHBrowns

Full Stack Engineer | June 2025 – Present

- Designed and managed a multi-AZ VPC architecture for a containerized Shopify public application
- Provisioned & controlled AWS infrastructure using CDK TypeScript, reducing deployment times from 15 minutes to 5 minutes
- Improved application deployment using Rollout strategy, releasing new versions safely without downtime
- Built CI/CD pipeline using CodeBuild & CodePipeline, automating deployments across 3 environments and eliminating manual work by 90%
- Containerized Node.js application with multi-stage builds and security best practices
- Integrated Shopify API to list products & discount codes and publish AI-generated, SEO-optimized blogs
- Built a serverless application using AWS serverless services and Serverless Framework v4 as IaC
- Revamped IaC YAML using nested stacks, improving scalability & maintainability
- Built a secure CI/CD pipeline for a serverless application using GitHub Actions across 2 environments

OCloudSolutions

Software Engineer | April 2022– Jan 2024

- Developed a React-based serverless application with AWS Amplify, delivering the MVP on time while reducing operational costs
- Implemented real-time updates using MongoDB streams and PusherJS, significantly enhancing user engagement
- Led a team of 2 developers, assigning tasks and onboarding them on an existing project
- Optimized React code with code-splitting and lazy loading, reducing load time by 30%

Education

- **Bachelor in information technology**
University of Education (2016-2020)
